

BioMed Realty Trust will be observing Earth Day (April 22nd) by giving some tree seedlings to each tenant to disburse among their employees. We request that the trees be planted to contribute to the well being of Earth. Please read the below informational page as BioMed Realty works to make our earth a little 'greener'

In celebration of Earth Day, BioMed Realty Trust would like to share an opportunity to improve the environment with our valued tenants.

Planting this one tree will help improve the environment we live in.

Did you that that trees . . .

- Manufacture five pounds of pure oxygen per day?
- Consume CO₂ to fight the Greenhouse Effect that threatens our survival?
- Provide the cooling equivalent of ten room-sized air conditioning units?
- Reduce fossil fuels used for heating and cooling?
- Collect pollutants from the air?
- Reduce noise pollution?
- Produce homes for birds and small animals?
- Enrich surrounding soil?
- Prevent soil erosion?

We hope you enjoy our gift to you and to our environment.
